

From competition to monopoly | $\sigma = 1.5$

--- Continued competition — Monopoly, $\chi = 7.5$ -.- Monopoly, $\chi = 1.5$

Output and wages: top, 100% = competition; bottom, multiples (log scale), 1x = competition.

AI-industry revenue: percent of own output in both rows; not net profit.

Open/filled dots: before/after exclusive rights. Vertical scales differ across windows.
